DETAILED ACTION

Election/Restrictions

- A. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-15, drawn to a method for controlling the display of video segments, classified in class 725, subclass 34.
 - II. Claims 16-19, drawn to a method for processing user profiles, classified in class 725, subclass 46.
 - III. Claims 20-31, drawn to a method for controlling the display of video programs (unlike Group I which controls the display of video segments), classified in class 725, subclass 25.

- B. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Proposed Invention I has separate utility because it is directed to a method for controlling the display of video segments, Proposed Invention II is drawn to a method for processing user profiles, and Proposed Invention III is drawn to a method for controlling the display of video programs (unlike Group I which controls the display of video segments). See MPEP § 806.05(d). Therefore, the asserted inventions are separately useable.

Art Unit: 2617

C. Because these asserted inventions are distinct for the reasons given above and the search required for each Proposed Invention is distinct, and each has acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
